

10 must-see exhibitions at Milan Design Week 2024

Celestial Attraction by Jérôme Pereira

French designer Jérôme Pereira will exhibit new sculptural lighting and furniture pieces, presented by Galerie Philia (Photography: Studio Brinth, courtesy of Galerie Philia)

Presented by [Galerie Philia](#) in the polished industrial photography studio [Spazio CB32](#), French designer [Jérôme Pereira](#) will exhibit his first solo show – a collection of nine works in timber, including light fixtures, a table, and sculpture – alongside two silk textiles by fellow French artist [Sylvia Eustache Rools](#). Conceptualised as mobiles and inspired by the artist's own background in geophysics, Pereira's organic lighting works are exercises in poetic balance, with some including branches and pieces of wood he scavenged from the forest near his studio in the southern French town of Lodève.

Via Cesare Balbo, 32, Milan
